PROFILE

A **dedicated Software Engineering** Intern with a strong commitment to skill enhancement through hands-on projects. Proficient in mobile and desktop app development, specialising in Kotlin, JavaScript, and other programming languages to produce high-quality, maintainable code. Exceptional organisational skills, a **collaborative team player**, and effective communicator with analytical abilities. Pursuing a Bachelor's degree in **Information Technology and Business Information Systems** at **Middlesex University, London** (Expected year of Graduation - July, 2024).

EDUCATION

BSc Information Technology and Business Information Systems

Middlesex University

09/2023 – present

London,

United Kingdom

In this program, I am engaged in the study of analysing and effectively conveying user perceptions and responses generated by the prospective utilisation of IT products and systems. This coursework provides me with valuable insights into comprehending the technical, organisational, and physical contexts within which IT products and systems function.

Advanced Diploma in Software Engineering

Aptech Computer Education

10/2021 – 06/2023

Abeokuta, Nigeria

Successfully completed an Advanced Diploma in Software Engineering Program at Aptech Computer Education, gaining exposure to a comprehensive range of Software Engineering concepts and acquiring technical expertise in highly sought-after technologies within this field.

PROFESSIONAL EXPERIENCE

Student Responsive Web Development (RWD) Intern

Aptech Computer Education

01/2023 – 03/2023

Abeokuta, Nigeria

As a student Responsive Web Design (RWD) Intern, I actively assisted the instructor in imparting essential RWD concepts to students, which included:

- Assisting in conveying practical knowledge about the technologies used in responsive web design.
- Aiding in the explanation of key components and UI frameworks that facilitate the RWD concept.

SKILLS

Developing Web Applications using React.js

I possess proficiency in developing web applications utilising React.js, complemented by a robust skill set encompassing technologies such as Express, Node.js, and more. Additionally, I excel in designing and implementing responsive and feature-rich web solutions.

Android app development with kotlin

I have attained an intermediate level of expertise in Android app development with Kotlin and possess a strong knowledge base in Android technologies, including Firebase and Firestore. My proficiency extends to various aspects of Android application development, contributing to well-rounded skills in creating dynamic and efficient mobile applications.

Working knowledge of Node.js

I have a strong foundation in backend development using Node.js, along with a deep understanding of backend technologies such as Express, RESTful APIs, MongoDB, and more. My knowledge extends to various aspects of backend development, contributing to a versatile skill set in building efficient and scalable backend systems.

PROJECTS

Thrift Fashion Store

09/2022 – 10/2023

Thrift-Fashion is an online thrift shopping store created using HTML, CSS, and JavaScript. It provides a convenient platform for users to browse and purchase thrift fashion items. This innovative e-commerce store was a collaborative effort developed by Team Achievers, where my role as a team member and project presenter played a pivotal role in its development.

Tsks Task Tracker

12/2022 – 01/2023

Tsks is a straightforward web application designed for task tracking, constructed using React, Sass, and Firebase technologies. It facilitates the management of daily tasks and leverages Firebase-Firestore for efficient task storage and retrieval.

Speechify

01/2023 – 02/2023

Speechify, a web application created using React and Sass, offers the ability to convert written text into speech. It does this by harnessing the browser's speech synthesis utterance to convert the texts to speech. It's worth noting that the optimal performance of Speechify is experienced on Chrome and Brave browsers.

Weather Glitz

06/2022 – 08/2022

Weather Glitz, a web application developed with React and Sass, retrieves weather data from an API and presents it to users for their convenience and information.

CERTIFICATES

**Certificate of Proficiency in
Information Systems
Management (CPISM)**
August 2022

**Diploma in Information
Systems Management (DISM)**
June 2022

**Advanced Diploma in Software
Engineering (ADSE)**
June, 2023

AWARDS

TECHWIZ 3 - A GLOBAL I.T COMPETITION

08/09/2022

Aptech Computer Education India

During the Tech Wiz Global competition, we were assigned the challenge of addressing the environmental impact of excessive clothing waste. To tackle this issue, our team conceptualized and developed a website dedicated to selling thrift fashion items. This innovative solution not only helps mitigate the environmental damage caused by surplus clothing but also revitalizes older garments. Our achievement in this competition was noteworthy, as we secured a commendable third-place ranking on a worldwide scale for our website's role in addressing this critical problem.

INTERSTS

Software Development, User Design and Experience, Augmented Reality (AR), Virtual Reality (VR) and Teaching.
